Whether you are shooting at long range with a rifle or at close range with a pistol, whether you want to shoot at steel or paper targets, whether you are looking for a single target solution or a tactical course with multiple moving targets, the BlinkTroll offers new and exciting possibilities.

BlinkTroll runs back and forth on a simple rope, so changing location is fast and uncomplicated. This gives you a unique flexibility when training.

BlinkTroll can be controlled using a smartphone and you can choose between several automated modes.

With its modular hardware and upgradable software, the BlinkTroll concept is flexible not just in use but at the very core of its nature.
The BlinkTroll will run on both a static rope setup or a steel wire. On flat terrain, tripods can be used as mounting points for the rope or wire.

BlinkTroll is delivered in a compact and robust flightcase. Perfect for the field, safe storage and transport.

We made a moving target that you can bring anywhere. Imagine the possibilities when you can simply attach a rope between two trees and run the target immediately! There are no wires and no need for grid power or heavy car batteries: all you need is to wirelessly connect your smartphone and tell the target what to do. Our moving target is a new way to think about shooting and achieve mastery of the art.

The BlinkTroll can be configured to your choice of target. With a carrying capacity of up to 6 kg, the BlinkTroll can be used with a steel target, cardboard cutouts or archery targets.

The BlinkTroll is controlled using a smartphone or a tablet.
SPECIFICATIONS

INTERCHANGEABLE BATTERY PACKS
- Easy battery mount
  - 2 Hours of operation on a single battery
  - Blinktroll can carry 2 batteries
- Sleep mode for longer battery life

WEATHER RESISTANT
- Temperature range: -10ºC to +50ºC
- Works in rain and snow

REMOTE CONTROL VIA APP
- Connects to the BlinkTroll using WiFi
- Start and stop sequences on app
- Available for Android (iOS app in development)
  - Pre-installed Android device available
  - Range: 100 meters, more with range extender

MODULAR DESIGN
- Lightweight
- Static line 6-10 mm compatible
- Speed: 2-6 m/s
  - Carrying capacity: Up to 6kg
  - Basic BlinkTroll module can be expanded with additional functionality

CONTINUOUS DEVELOPMENT
- Modular hardware add-ons
- Continuously improved app
- Hit Detection System under development
- Adaptable to your requirements

SPECIFICATIONS

5
The Blinktroll is easily tailored to your specific needs and scenarios:
- Closed quarter combat
- Long range shooting
- Hostage situation

You can create advanced scenarios using multiple BlinkTrolls:
- Event-based
- Hit Detection System under development
- On a timer
- Instructor control mode

Improve and track the skills of marksman. With the ability to create event-based scenarios, you can insert unpredictability into your training.

“Fast accurate hits are what separate success from failure; on the street, on the battlefield and when hunting.”
Instant and continuous feedback helps instructors give proper guidance with the addition of the BlinkTroll Hit Detection System.

Shooters who can hit a moving target on the range are better prepared to hit a moving target in the field.

Create fun and challenging shooting competitions.

Speed is adjustable to suit your target, from walking deer to running wild boar.
